Book Details:

Review: Im comparing this book (MB) to Molecular Biology of the Cell (MBoC), which is probably my favorite textbook of all time. This one (MB) is not as much of a general cell biology book as it primarily covers only the elements of the so-called central dogma of molecular biology. DNA replication and transcription into RNA, and RNA translation into protein,...

Description: The biological world operates on a multitude of scales - from molecules to tissues to organisms to ecosystems. Throughout these myriad levels runs a common thread: the communication and onward passage of information, from cell to cell, from organism to organism and ultimately, from generation to generation. But how does this information come alive to...
